

LABWORKS ES LIMS

from PerkinElmer

Quality and compliance...

always on our menu

LABWORKS ES LIMS from PerkinElmer

Recipe for success: One part collaboration. One part compliance. One part confidence.

In the food and beverage industry, staying in spec is a top priority. Laboratory managers need systems that work safely and efficiently, with very little room for variation. And if there is an exception, it will be identified and remedied as soon as possible.

LABWORKS™ ES LIMS from PerkinElmer® is designed to provide those very sensitive yet powerful systems. With nearly 20 years of global experience to become one of the leading user-rated LIMS, LABWORKS has security and functionality that will serve your laboratory well.

A step-by-step system to boost productivity and ensure compliance

Your LABWORKS ES LIMS system is designed to meet the unique needs of your laboratory's processes, including:

Integration: Whether it's software or instrument interfaces, your LABWORKS ES LIMS will be configured to your specifications, and will seamlessly integrate with other ERP software systems including PeopleSoft®, Oracle® and SAP R/3.

LABWORKS ES LIMS and H&A Scientific, Inc.: Offering a fresh idea.

PerkinElmer, Inc. and H&A Scientific, Inc. have collaborated on an integrated solution for effective LIMS functionality coupled with Stability Study Management. This solution is designed to comprehensively address the needs of organizations that use stability/shelf-life processes. Food and beverage companies can leverage the integration of the LABWORKS ES LIMS and SLIM Stability Lab Information Management to effectively manage their stability and LIMS functions.

Information Sharing: With the unique Explorer and Online Administrator™ tools, LABWORKS ES LIMS users can view data and reports online, at any time. All approved users can view data using the Explorer module or via a web browser with the Online Administrator program.

Security: During development of your LABWORKS ES LIMS, your existing system will continue to run without interruption. This is our industry-exclusive Dual Hosting feature: your new system won't be brought online until it is completely tested and ready to replace your original system.

Ease-of-use: Analysts, plant managers, operations managers and laboratory technicians can create their own queries in the system, in their own language, without assistance from an internal IT professional. In addition, we offer pre-scheduled and custom training courses for users interested in enhancing their LABWORKS knowledge.

Extended Functionality: LABWORKS ES LIMS provides access to vital information including SOPs; monitors instrument maintenance and calibration data; and maintains users' certification to run assigned tests.

Sample Processing Management: LABWORKS' powerful Process Scheduler module is a multi-purpose application used to schedule routine sampling and allow your entire organization, even personnel working outside the laboratory, to monitor statuses. Process Scheduler also enables you to print and automatically enter bar-coded labels onsite.

"The biggest advantage of the new LIMS is time savings that extend throughout the analysis process. Nearly everyone involved in the process, including the customers, analysts and supervisors, saves a considerable amount of time."

— Chemist
California Winery

It starts with Mission Critical Certification, the first step on your path to success

Mission Critical Certification™ (MCC) is our exclusive discovery and implementation process during which our representatives work with you to identify your requirements and establish systems to meet them. We develop process maps that illustrate your laboratory's workflow, including sample paths that make it very clear exactly which analysis programs need to be executed, and when.

LABWORKS Customer Service: the perfect mix of technical expertise and personal attention

Your project team includes professionals who are hand-picked by skill set and experience level, according to your specific installation criteria. They are responsive to your needs and stay in close contact to keep your laboratory moving as efficiently as possible. Backed by the expertise and resources of PerkinElmer, it's no wonder LABWORKS Customer Service and Support is highly regarded in the industry.

More important, 9 out of 10 of our customers would recommend LABWORKS to a colleague.

This wine producer achieved faster results with efficient scheduling.

See what LABWORKS ES LIMS can do for you.

LABWORKS ES LIMS instantly improved the speed at which test results moved through this laboratory, improving service to their internal customers and resulting in a significantly increased ROI. The LABWORKS

software was configured to their exact data needs, so calculations and reports could be produced without additional programming. Find out more about how this team increased their productivity.

Up to spec and exceeding expectations:

PerkinElmer

Setting the standard for quality, performance and service for nearly half a century, PerkinElmer has a well-deserved reputation for excellence. We can provide all of the elements needed for a top-quality, highly efficient laboratory, from instruments to a configured Laboratory Information Management System, to best-in-class customer service. We've brought in a partner to strengthen our offering in Stability Study Management. In fact, we're so sure that we'll pass your tests for excellence

that we have developed proven metrics to calculate your ROI... one of the only LIMS suppliers in the entire industry to do so.

LABWORKS ES LIMS brings so much to your table, full of features designed to save time and money, improve throughput in the laboratory and facilitate communication within your organization. Supported by unmatched customer service, your LABWORKS ES LIMS gets results.

DISCOVER THE LABWORKS ADVANTAGE FOR THE FOOD AND BEVERAGE INDUSTRY

EXTRAORDINARY QUALITY CONTROL

LABWORKS ES LIMS is specifically designed to interface with other systems in your organization, while also adhering to government regulations and guidelines for integration of documents, data auditing and reconstruction, as well as providing a traceable chain of custody.

SECURE AND SEAMLESS TRANSITION

Only from PerkinElmer LABWORKS, Dual Hosting ensures that your existing system will function without interruption while your new system is developed and prepares to go live. The changeover will be seamless and the benefits will be immediately apparent.

ACCESSIBLE TO MULTIPLE USERS

Thanks to LABWORKS Explorer, read-only data can be viewed in Windows® Explorer by non-LIMS users, from any computer platform. Even plant supervisors and field personnel can acquire valuable information with portable devices that can be supplied by PerkinElmer, from hand-held computers with GPS mapping, to Toughbooks, to palm-type devices.

UNPARALLELED CUSTOMER SERVICE

Nine out of ten of our customers would recommend us to a colleague. That's an incredible statistic, but not a surprising one to PerkinElmer. Each one of our customers gets a project team assembled according to that particular laboratory's specifications and goals. The team is responsive, experienced and dedicated. When you communicate with your customer service team, you can be sure they speak your language.
