

You never know where your But you can be sure PerkinElmer

For essential research tools you can trust, PerkinElmer is a proven resource for your research. Why can you have complete confidence in PerkinElmer Reagents?

The answer is our commitment to — and excitement about — your research. Because we are scientists too, we share your passion for discovery. We offer the broadest and most versatile line of labeling and detection reagents available from a single provider. And we provide our customers with unmatched standards of quality and service.

Supporting radiochemical research for 50 years

Ultimately, however, it's the people of PerkinElmer who make us the best global partner for your lab. This catalog is dedicated to the people behind our NEN® Radiochemicals and their role in supporting your research. May 2006 marks the 50th anniversary of the founding of NEN (New England Nuclear) and we are celebrating our many years of innovation and manufacturing excellence. As part of our year long celebration we are building new world-class radiochemical manufacturing facilities!

We are proud to have been a key part of your research in fields such as receptor research and molecular biology at a time when our radioligands and radionucleotides were elemental to new scientific discoveries.

Providing advanced detection technologies today

Today, NEN Radiochemicals are just one part of the essential tools we offer for your research. Chemiluminescent and fluorescent labeling and detection products developed at NEN plus advanced detection technologies and assay platforms originating from Packard and Wallac bring you the broadest and most versatile line of labeling and detection technologies available from a single provider. And it's all part of PerkinElmer Reagents — one source, from one supplier.

When you choose PerkinElmer as a partner, you take advantage of some of the finest scientific minds in the industry. With our knowledge of assay chemistries, molecular biology, screening and detection, we've been able to create unique, application-specific solutions our customers simply can not obtain from any other source.

At PerkinElmer, we embrace innovation, because we believe change brings opportunity. But one thing will never change — our commitment to customer needs and quality.

Delivering everything you need for your research — always

Ours has been a one-of-a-kind success story. We've been providing researchers with essential tools they trust for over 50 years. Match our reagents with our world-class, application-focused instrumentation and benefit from one expert provider who understands every aspect of your work. PerkinElmer is the only reagents supplier to also offer a full line of associated liquid scintillation analyzers, microplate readers and imagers, and liquid handling workstations. Our reagents, consumables, market-leading instrumentation, and extensive applications portfolio mean that when you choose PerkinElmer, you can be certain of a strong partner with a depth of experience and expertise you will find nowhere else. Now. And into the future.
